YEAR OF WAR BRINGS IMPROVEMENTS IN SURGERY

(By Associated Press.)

LONDON, Aug. 19.—A year of war has worked a revolution in the army surgeon's method of dealing with the ordinary wounds of the battlefield, which, on account of the changed character of the projectiles, are more severe than in previous wars. In almost every instance of wounds from modern artillery, the broken tissues are found by the surgeon to have become infected by scraps of cloth or other material, on a scale without precedent. At the start, most of the surgeons relied on a stringent applica-

tion of recognized methods of antiseptics to combat this infection. The tissues were deluged with powerful germicides, even strong carbolic acid being employed.

The success of this method, however, was far from complete, and gradually a new system, based on well known principles, but entirely novel in application, was substituted.

One of the elementary principles of physics is that if a vessel contains two solutions of varying strength divided from each other by an animal

membrane, liquid will pass from the weaker to the stronger solution until ultimately both are of the same strength. This principle was brought into action in the treatment of injuries in order to stimulate the action of the serum of the blood, which has strong antiseptic properties. The wound is filled with a liquid solution of salt and sodium citrate at a considerably greater concentration than that in the serum of the blood. Under the influence of this liquid the serum is poured out from the body

into the wound, tending to cleanse it and to destroy the bacteria that are present.

This system has the great advantage that it leaves the tissues unimpaired by the fluids used for the destruction of germs. "The full recognition of the efficiency of this method, introduced largely through the efforts of Sir Almroth Wright," says a medical writer, "must be regarded as one of the most important advances made in surgery as a result of the war."

DISTINGUISHED PARTY WILL VISIT HUMBOLDT CAMPS

A distinguished party of visitors from the east, who will probably make a thorough examination of the different mining districts of Humboldt county, are expected here at any time, according to advices received by friends here. They are coming from as far east as New York by auto and will stop over here a few days en route to the exposition, says the Lovelock Review-Miner.

Among the party will be Charles Crane of the big Crane iron and steel interests of Pittsburgh; Mr. Tilden, son of the president of the United States, who is in the city on his way to the Griffith Car Wheel company, and Walter A. Rehm, capitalist of Chicago.

TEMPERATURE REPORT

Highest temperature yesterday, 88; a year ago, 87.
Lowest temperature last night, 67; a year ago, 59.

ASSESSMENT NOTICE

TONOPAH BONANZA MINING COMPANY

Location of principal place of business, San Francisco, California. Location of works, Esmeralda County, Nevada. Notice is hereby given that at a meeting of the board of directors, held on the 10th day of August, 1915, an assessment (No. 2) of one (1) cent per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the company, No. 365 Bush street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 15th day of September, 1915, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Monday, the 15th day of September, 1915, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

By order of the board of directors, ALFRED K. DUBROW, Secretary.

Office, No. 265 Bush street, San Francisco, California. A125111

RESCUE-EULA MINING COMPANY

Location of principal place of business, Nevada. Location of works, Tonopah, Esmeralda County, Nevada.

NOTICE—There are delinquent upon the following described stock, on account of Assessment (No. 9) levied on the 15th day of June, 1915, the several amounts set opposite the names of the respective shareholders, as follows:

REFUGEES FROM FLANDERS HEAR THE OLD FAMILIAR BELLS OF CATTISTOCK

(By Associated Press.)

DORCHESTER, England, August 19.—The carillon, or concert of church bells, which was one of the great features of life in Flanders before the war, has been adopted at Cattistock, a village near here, where there are several hundred Belgian refugees. A fine set of bells has been installed in the Cattistock church, and the first recital on them was given this week by Mr. Joseph Denyn, bellmaster of Malines.

The hour's program consisted principally of folk tunes of Belgium and national airs of England. "Chanson d'Ypres" and "Valeureux Leigels" were followed by "Men of Harlech" and "Banks of Alan Water," and the national anthems of the allied nations brought the recital to a close.

"The first recital," said M. Denyn, "was purposely of a very popular kind. It was primarily for an English village audience who had had Belgian guests staying with them for the past year. The later programs will include music of a more advanced kind, and music which is ready more suited to the genius of the carillon. Broken chords, impulsive arpeggios, and the like, will be played in the style of the harpsichord, provide the true technique of the Carillonneur."

INTERNED OFFICERS DESIRE TO ESCAPE

THE HAGUE, Netherlands, Aug. 19.—Twenty-seven Belgian, French and English officers still elect to remain prisoners on the Island of Urk, in the Zuyder Zee, rather than promise that they will not try to escape from Holland and return to their colors to fight. If they were willing to give their promise not to try to escape they would be allowed to roam anywhere in Holland, but the twenty-seven on the Island of Urk prefer to remain prisoners, openly avowing their intention to escape if possible. This makes the situation something of a game between the prisoners and their Dutch guards.

The Island of Urk is itself a sort of geographical joke, for it is little more than a small sandbank that was left high and dry when the sea drowned the central part of The Netherlands and formed the Zuyder Zee. Some 2200 people, however, now live on this little stretch of land, which the average pedestrian may cross in ten minutes. The islanders are extremely clannish and stick to the dress of 200 years ago. They amuse themselves by fishing for herring and anchovies and in building dykes against the terrors of the North sea in winter. The presence of interned French, Belgian and English officers is regarded as a sort of sporting affair even among the Dutch guards. The commander describes the situation by saying, "We are excellent friends with our prisoners. We greatly respect the men who try to escape and return to their country to go on with the fight. Only it is our duty to keep them here."

Next to Commander Nyssens of the Belgian army who was pulled across the Dutch frontier by his own men after he was rendered unconscious by seven bullet wounds, the most popular prisoner is an Irish major of the British flying corps who actually made his escape from the island by swimming for some three hours and who would have succeeded in his flight but for the small mishap which landed his boat in a village which was under martial law.

Since this attempt, however, the island is more strongly guarded than before. The foreign officers are not allowed to speak with the people from the village. All foreign and Dutch yachts are carefully watched. A torpedo boat stationed in the little harbor is kept ready to pursue all future swimmers, and guards have been placed in the tower of the church to survey the whole island.

STUNG BY SCORPION
Little Margaret Park, the 7-year-old daughter of Fred Park, stepped on a scorpion with her bare foot Thursday evening and was painfully stung by the creature. Dr. Hewston was called and the little maid, although at first suffering severely from the poisonous wound, has now nearly recovered.—Las Vegas Age.

NORWAY EXHAUSTS SUPPLY OF AUTO TIRES

(By Associated Press.)

CHRISTIANIA, Aug. 19.—Norwegian owners of automobiles are hard hit by the announcement of dealers that the supply of tires has been exhausted and it is impossible to replenish the stock to any extent because the belligerent countries are taking up all the world's supply. At present it is said there is not a new tire to be bought at any price anywhere in Norway.

The situation is much more than annoying, for it will have a serious economical effect on Norwegian farming. It is doubtful if any country has adopted the automobile more extensively in a public way, for in Norway the sparsely settled hills have never been able to support railways and the automobile has come to be the principal means of communication and transportation both for the farmer and commercial men. The innumerable cars which have been put to service in recent years are all of foreign manufacture, for there is no automobile factory in Norway, and the same is true as to oil, gasoline and tires. The importation of tires has steadily decreased since the European

war began, and the present impossibility of obtaining new tires has forced many of the taxicabs in Christiania to go out of business. The cars on the public automobile routes in the country are wearing their tires down to the last thread, and it appears their services may soon have to be cancelled.

The Royal Automobile club, of which King Haakon is honorary president, is now negotiating with foreign governments in the hope of getting permission to import tires, with guaranty on the part of Norway that the tires will not be exported to any belligerent country nations.

ORE IS RICH

The ore of the Oro Amigo mine at Platina still holds its phenomenally rich character. G. A. Fayle brought in some samples Monday which assayed \$250 in gold and 6 ounces of platinum. The orebody is improving with development and the values run about the same as when the discovery was made some weeks ago.—Las Vegas Age.
